August 2025 - December 2025

GUIDE

3-4 **BACKGROUND**

5-23 **PRODUCT DEVELOPMENT**

22-31 **MARKETING PLAN**

32 **REFLECTION**

BACKGROUND

For FTM318 (Fashion Development Processes), we completed a semester-long project centered on designing, developing, and manufacturing a complete size run for a defined target consumer under the style constraints of an imagined Western brand, Saddles. The project was structured to mirror a real-world product development cycle, integrating brand positioning, consumer research, and marketing strategy alongside creative and technical execution.

My group was assigned the Men's Big & Tall category, covering sizes XL through 5XL. Throughout the semester, we worked through each stage of development, from market and consumer research, concept development, and merchandising considerations to technical design, pattern drafting, grading, and marker creation, culminating in the physical production and sewing of a full graded size run. Emphasis was placed on fit consistency, production feasibility, timeline management, and clear technical communication across extended sizing.

MY ROLE AS TECHNICAL DESIGNER

As part of a two-person technical design team, I worked on translating the original design concept into a production-ready garment through pattern development, grading, marker making, and virtual fittings. I oversaw the translation of fit notes into finalized pattern pieces, established and applied grade rules across an extended size range, and built full production markers to support an efficient cutting process. I also contributed to the bill of materials and order of operations, and served as a key contributor throughout the sewing and final assembly process, while other group members focused on the marketing research and plan.

PRODUCT DEVELOPMENT

OUR GARMENT

For our garment, our designer drew sketches of a canvas shacket that featured an A-line hem with patchwork design across the front, back, and sleeve. With the material of a jacket and design structure of a shirt, my responsibility was to bring this garment to life through technical design and product development.

COLORWAYS

FABRICS

Cocoa Brown Canvas for main
bodice pieces
100% Cotton
\$10.00/Yard

Embroidered Cotton for
patchwork
100% Cotton
\$8.00/Yard

The heavyweight cotton canvas was chosen for its durability and structure, allowing the shacket to maintain shape and consistency across an extended size range. The embroidered cotton patchwork was selected for visual impact, adding contrast and character to the garment.

MARKETING PLAN

TARGET MARKET

Target Demographic

Gender: Male (Big and Tall)

Age: 20s-30s

Men who embody rugged individualism and vintage appeal, while prioritizing durable clothing. Targeting those who are willing to spend a little more for better quality and styling appeal without dipping into luxury brand prices.

Psychographics:

The typical man who will shop at Saddles Big and Tall is a confident, style-conscious man who embraces a rugged yet refined look, wanting his clothes to be stylish but also allow for the rugged work of his everyday life. No matter if He's herding cattle or just going out, he's always finding a way to stand out from the crowd.

DESIGN SECTOR

We plan to market our product to men in this sector by emphasizing practical features like durability, and functionality with a straightforward in-store experience. To build loyalty, we will focus on repeat purchase strategies and long-term customer relationships. Our brand aims to appear authentic, inclusive, and transparent, using real world, rugged imagery that reflects how our products are actually used. Because our target customers prefer in-store shopping, we will create an inviting, engaging retail environment that encourages frequent visits.

ONLINE ADVERTISEMENT

One of the key strategies for promoting our new line of Trailstone overshirts will be leveraging online advertising featuring a celebrity endorsement. We've chosen award-winning country singer Luke Combs as the face of this campaign, as his authentic, rugged style perfectly aligns with the spirit of our brand. His image will be featured across general web platforms as well as prominently on our own website to help create a strong, relatable connection with our audience.

SOCIAL MEDIA MARKETING

Our social media presence will be primarily on Instagram. This platform is the best way to target our demographic of 20 to 30 year old men. We will focus on visually showcasing the collection's blend of western style, comfort, and elevated design. Content would highlight the warm color palette, rustic patterns, and key details that make the pieces stand out, while featuring models in sizes XL–5XL to emphasize inclusivity and proper fit. Short form reels would showcase men using the garment in rugged outdoor environments. We would also use western targeted hashtags to increase engagement and reach our target market.

VISUAL MERCHANDISING PLAN

IN-STORE MOCKUP

Our social media presence will be primarily on Instagram. This platform is the best way to target our demographic of 20 to 30 year old men. We will focus on visually showcasing the collection's blend of western style, comfort, and elevated design. Content would highlight the warm color palette, rustic patterns, and key details that make the pieces stand out, while featuring models in sizes XL–5XL to emphasize inclusivity and proper fit. Short form reels would showcase men using the garment in rugged outdoor environments. We would also use western targeted hashtags to increase engagement and reach our target market.

REFLECTION

This project was an engaging introduction to the full technical design and product development process, particularly within men's big and tall sizing. The patchwork construction added an additional layer of complexity to grading and virtual fitting, making the project both challenging and rewarding from a technical standpoint. Developing and applying grade rules across an extended size range reinforced the importance of thoughtful proportion and fit consistency. Overall, the project strengthened my understanding of how technical decisions influence production, fit, and final garment quality, while also providing exposure to the broader development pipeline, from merchandising and brand planning through final production.
